

1. Write a program (using switch case) that ask the user to enter the item number and prints the price of this item according to the following :
No 1 price 100,
NO 2 price 200,
No 3 price 300,
No 4 price 400
2. Write a C++ program that takes an integer input representing a day of the week (1 for Monday, 2 for Tuesday, etc.) and prints the corresponding day's name using a switch statement. If the input is outside the range of 1 to 7, print "Invalid input."
